Summary

Hi, I'm Josh, a Sr. full stack web developer with experience managing team members, processes, and tech. I'm a fluent communicator, parsing business and technical details into clear goals. I relish the opportunity to help and develop team members and collaborate with UX designers and product owners. Hiking and photography are in my blood and solving code and business challenges keep my mind moving daily.

Employment History

Technical Director, Swift Agency, 11/2012-Present
1250 NW 17th Ave, Portland, OR 97209 - paul.wille@swift.co
- Established documentation standards in collaboration with development team.
- Developed ticket management workflows tailored to project needs resulting in clear reporting and status of tasks within sprints and deployments.
- Established process for procuring inter-office work orders with partner agency offices in the USA, Central America and Europe.
- Managed and contributed to development of ground up redesigns for http://stouffers.com, http://outrigger.com, http://hotpockets.com and others.
- Rendered http://naturebridge.swiftclients.com/ as part of a "pro-bono" project. Tested deploying to Google Cloud Platform.

Owner / Full Stack Web Developer, Oregon Web Services 02/2009-10/2012
- Converted access database used to store inventory and bill of ladings for ewco.com to online LAMP environment so that contractors can order job equipment remotely.
- Managed/maintained multinational site with 6 different repositories including ecommerce and online courses that have served over 5,000 students.
- Delivered multiple website designs and programs with full customer satisfaction.
- Directly managed all invoicing and business accounting.

- Programmed and implemented connection between UPS customer software on off-site computer and website database to show actual costs of shipping fulfillment.

PHP / Drupal Sr. Full Web Stack Developer, TekSystems for Oregon Catholic Press 06/2008-01/2009
- Placed by TekSystems in team project at Oregon Catholic Press to upgrade multiple Drupal 5 modules to Drupal 6 and interface with new API for inventory/cart management tool. Was promoted to also work with department heads to document updated objectives. Was offered extended contract to continue on in project completion and future projects.

Sr. Full Stack Developer/Web Team Manager, Oregon Web Team 2004-06/2008
- Experience with multiple websites working directly with clients and development team from start to finish.

Graphic Designer, The Outlook newspaper 2003-2004
